Butt welder

Butt welder EBS for sawblades, incl. shear and grinding motor.

Available EBS types:

- ⇒ For bandsaw type SSF 420:
EBS16 for **max. 13 mm sawblade width**
- ⇒ For bandsaw types SSF 520, SSF 630, SSF 1600:
EBS 25 for **max. 20 mm sawblade width**

Electronic annealing function for welding unit

Electronic annealing function for continuous setting of the annealing voltage for convenient treatment of the weld (for voltage until 400 Volt, 50 Hertz)

SAWBLADE GUIDANCE

(dimensions depending on sawblade)

Jaw guides with inserts

Bracket jaw guides bottom and top including carbide-tipped guide inserts for bracket jaw guides

Inserts for jaw guides

Carbide-tipped guide inserts for jaw guides

Roller guides

Roller guides including guide rollers used for cutting speeds starting at 250 m/min.

Guide rollers

1 set = 2 pieces with rim, 2 pieces without rim

SAFETY EQUIPMENT

Emergency push-button

Additional foot switch on the lower part of the machine for emergency stop.

Magnetic brake upper wheel

Automatic braking of the upper wheel by magnetic brake, in case of loss of tension or saw blade breakage.

When applying the magnetic brake upper wheel for a SSF 420, a Manual saw band tensioning device with hydraulic indicator is also required.

HELPFUL EQUIPMENT

Straight cutting device

(not available with feed table)

The straight cutting device is placed on the worktable with 4 pins.

The feed is manual. By means of a mitre-adjustable feed angle and an adjustable cross-cut fence, cuts can be made at an angle of up to 45° and in lengths of up to 230 mm. The cutting depth can also be limited with another adjustable stop.

Technical data:

Size: 400 x 400 mm

Feed way: 240 mm

HELPFUL EQUIPMENT

Parallel ledger

Parallel ledger consisting of:

- Scaled guide bar
- Guide cone with clamping
- Stopper lineal
- Maximum adjustment range of ledger:

Type SSF 420 up to 290mm

Type SSF 520/SSF 630/SSF 1600 up to 390mm

Type SSF 801 up to 550mm

Workpiece holder

Workpiece holder for safe and exact guiding of the workpiece.

Cutting support device

The cutting support device is used to cut thin sheets with thickness up to approx. 6 mm.

Due to the small contact surface the sheet is prevented from vibrating and thus minimises the risk that teeth of sawblade break.

FEED TABLES STANDARD BANDSAW MACHINES

Feed tables

- Feed table with 4 T-grooves
- Feed way depending on machine type
- Work table inclinable, to the right side approx. 8° and to the left side approx. 14°
- Instead of usual table execution

Available versions:

- Manual feed table with locking mechanism (not available for type SSF 801)
- Manual feed table with lead screw
- Electric feed table with servo motor and ball screw

If an electric feed table is selected, the SSF 420 band saw machine is supplied incl. manual band tensioning device with hydraulic display. From size SSF 520 onwards, this device is serially included in the band saw.

<u>Feed way / Table sizes:</u>	Feed way approx.	Table size approx.
SSF 420	230 mm	600x700 mm
SSF 520, SSF 630, SSF 1600	350 mm	830x790 mm

Tables in other sizes can be quoted on request.

Examples:

Manual feed table SSF 420, with lead screw

Electric feed table SSF 420

SPECIAL EQUIPMENT FEED TABLES

One-axis-positioning control

The desired feed length is entered via keyboard. The actual value is shown on the digital display. A resolver is used for electronic routing. The feed movement is switched off automatically when the pre-set measurements are reached.

A maximum of 10 programs with 10 lines each can be stored.

OTHERS

LED lamp

LED lamp for lighting of the working area.

Minimum spray device

Lubrication of the saw band by a minimum spray device.

Consisting of:

- 1 spray head
- Pressure container for 1 l content (lubricant not included)

Manual saw band tensioning device with hydraulic indicator

(only for SSF420 - included in model SSF 520 and up)

Manual saw band tensioning device with hydraulic indicator, instead of the usual saw band tension indicator, including switching off the drives in case of saw band breakage.

Blowing off device

Blowing off chips at the sawblade.

Pressure air provided by customer.

OTHERS

Alignment with laser

For exact positioning a laser beam projects a laser beam on the surface of the workpiece. This beam points out the cutting channel.

Used laser:

Helium-neon-laser with a prefixed line-optic, not dangerous for the eye (corneal reflex).

Swivelling control panel

(included in type SSF 1600)

Control panel with two pivotal points:

- Pivotal point 1 at the saw throat
- Pivotal point 2 at the operator's panel

The most important operating keys are integrated in the control panel. The main switch remains in the control cabinet.

Height of bottom edge operator's panel 1400 mm.

Hydraulic sawblade tension

- Tension is activated by push button
- Should the saw blade tension loosen, the preset sawblade tension resets automatically
- When the machine is turned off, residual tension remains, to prevent the saw blade from sliding off the wheel

Connection piece for suction

Suction of chips at two points: lower sawblade guidance and lower wheel-box. Joined to 1 suction point for connection to suction system (by customer).

Design:

- Funnel with connection pieces under the working table, at the lower sawblade guidance
- Connection pieces in the lower wheel-box
- Housing of the drive wheel

OTHERS

Suction unit

(Suitable for SSF 420, 520, 630, for SSF 801 on request)
